

Sheet metal working machines
for demanding professional use

New budget double folding machine KST

Steel (400 N/mm²) sheet maximum thickness up to 1,25 mm

Sheet width up to 1 250 mm

Sheet length up to 3 000 mm

Control system VP4000PC 3D provides profiles creation visually in edit mode by touch to touch, by adding lengths and angles or by using arrows to enter direction and length. The control unit, based on an **industrial PC** and equipped with **15-inch touch screen**, greatly simplifies the process of the profiles designing, editing and bending simulation.

Sectional backstops for tapered bending (optional).

The improved safety system includes light curtains, laser sensor for upper beam and fences (optional).

Remote access for maintenance and upgrades!
